Tailored to serve your needs
System 3R offer automation solutions with industrial robots, both stationary and rail versions within the Die & Mold and Precision Production sector. Fanuc solutions covers applications in terms of:

- ... transfer weight from 70-700 kg
- ... radial reach, up to 3400 mm
- ... complexed transfer movements
- ... parts handling

- Whatever the Automation requirement, the Fanuc solution can be tailored to serve your needs: customer-specific solutions.
- Modern technology & smart technical solutions using standardized modules allow for cost-effective yet flexible Automation
- User-friendly cell management software: complex Automation made easy!
- Everything from your single source supplier: GF Machining Solutions

Achieve greater return on your investment!
Begin with a single machine and small magazine capacity.

Begin

Add a second machine and a rotary magazine for more capacity.

Add
Place the Fanuc on rails and add magazine capacity to serve additional machines, or start with a similar solution from the beginning.
Customer-specific Solutions

Tailored to serve your needs

Milling application
- Fanuc 360 – Stationary robot
- Milling machine
- Rack magazines
- Loading/index station
Milling application
Fanuc 700 – Stationary robot
Milling machine
Rack magazines
Loading/index station

Milling application
Fanuc 700 on rail
Three Milling machines
Rack magazines
Loading/index station
Standardized modules

For cost-effective solutions

- **Rotary magazine**
  - Large capacity in a small footprint

- **LFT Small loading station**
  - One single station for reloading workpieces on pallets or used as a loading station

- **FANUC**
  - 70-700 kg transfer weights

- **Rack magazine**
  - Full rack magazine or half rack magazine for electrodes or workpieces
LFT Rack magazine
Full rack magazine

LFT Large loading station
Load and unload parts without stopping the Automation cell

Loading/index station
Load and unload parts without stopping the Automation cell

Cleaning machine
Clean, rinse and dry the workpieces
WSM – WorkShopManager

User-friendly Cell Management Software

- Necessary data is entered quickly and in a structured manner.
- Quick, precise overview of the entire process chain
- Increased flexibility: The order of priority can be changed at any time.
- Simpler, safer preparation of automated cells
- The risk of errors due to the human factor is minimized.
- Increased process security
**Preparation – WorkCenter**

- Create an order
- Assign operations and NC programs
- Retrieve offset values
- Release the order for production

**Execution – CellManager**

- Manages the pallet ID codes and magazine positions
- Creates priority lists
- Automatically starts available jobs in the order of the priority list
- Updates the information in the database with the status and machining times of individual orders

**Monitoring – CellMonitor**

- Display status of all cells
- Display status of individual machines and processes

**Statistics – WSM Statistics**

- Retrieve and analyze cell utilization data
- Retrieve and analyze order data
Customer Services

Optimize the uptime of your equipment with our Machine Support services

Annual reconditioning minimizes production stops and optimizes function, precision and performance. GF Machining Solutions offers comprehensive services for your Automation, reference systems and masters and calibration tools.
Preventive maintenance

**Automation**
- Mechanics
- Pneumatics
- Peripheral equipment

**Reference systems**
- Rebuilding chucks
- Inspecting references
- Checking clamping force

**Masters and calibration tools**
- Cleaning and polishing
- CMM inspection
- Quality certificate

**CE Certification**
GF Machining Solutions’ Customer Services also offers CE Certification of Conformity for complete Automation cells.
### Technical specifications

**Fanuc**

#### Fanuc 70/165/210/360/700

#### Accessories

| LFT half rack magazine, max pallet size | 850 x 550 mm [33.5 x 21.6 in] |
| LFT full rack magazine, max pallet size | 850 x 800 mm [33.5 x 31.5 in] |
| Half rack magazine, max pallet size    | 480 x 400 mm [18.9 x 15.7 in]  |
| Full rack magazine, max pallet size    | 700 x 450 mm [27.6 x 17.7 in]  |
| Rotary magazine, max. pallet size      | 320 x 320 mm [12.6 x 12.6 in]  |
| Multiple loading station               | Depending on tooling and number of positions |
| LFT loading station                    | 850 x 800 mm [33.5 x 31.6 in] |
| Loading station                        | max. 200 kg [440 lbs], 450 x 450 mm [17.71 x 17.71 in] |
| Loading/index station                  | 570 x 570 mm [22.4 x 22.4 in]  |
| Cleaning machine                       | max. 200 kg [440 lbs], 500 x 500 mm [19.68 x 19.68 in] |
** Rail type **

- **Standard** (only for 70 & 165 versions)
- **Heavy**

---

**Robot rail**

- Max robot travel, Standard: 20 m (787 in)
- Max robot travel, Heavy: 30 m (1181 in)

**Max number of machines**

- Stationary cell: 3
- Linear cell: 12

---

**Fanuc 70**
Reach capacity: 2050 mm, 80.7 in.
C-Rotation: 360°

**Fanuc 165**
Reach capacity: 2655 mm, 104.5 in.
C-Rotation: 370°

**Fanuc 210**
Reach capacity: 2655 mm, 104.5 in.
C-Rotation: 370°

**Fanuc 360**
Reach capacity: 2655 mm, 104.5 in.
C-Rotation: 360°

**Fanuc 700**
Reach capacity: 2832 mm, 111.4 in.
C-Rotation: 360°

---

**Depending on model/type**

- Fanuc 70 = 1757 mm (69 in)
- Fanuc 165 = 2081 mm (82 in)
- Fanuc 210 = 2115 mm (83 in)
- Fanuc 360 = 2285 mm (90 in)
- Fanuc 700 = 2565 mm (101 in)

**Depending on model/type**

- Fanuc 70 = 1717 mm (67.6 in)
- Fanuc 165 = 2322 mm (82 in)
- Fanuc 210 = 2387 mm (91 in)
- Fanuc 360 = 2415 mm (95 in)
- Fanuc 700 = 2810 mm (110.6 in)
Magazines are available in two basic designs: rack and rotary. Each magazine unit consists of a number of shelves (determined by the height of the workpieces in question).

### Rotary magazine

* Other tooling upon request
** Positions per level
Note: The maximum height of the workpiece depends on the number of levels
Technical specifications
Accessories

Multiple loading station & LFT Loading station
Used for loading and unloading without the need to stop the Automation cell

The station is equipped with ID antennas and presence sensors.
It can be configured to meet the requirements of tooling type and part sizes.

Loading/index Station
Used for preparing the workpieces with a indexing table.

- Max. workpiece size, round: dia. 800 mm (31.5 in)
- Max. workpiece size, square: 570 x 570 mm (22.4 x 22.4 in)
- Max. load: 500 kg (1111 lbs)
- Load or work preparation area for all standard tooling
- Indexable every 30°
- Collecting tray for oil & flushing liquid
- Presence detection

Cleaning machine
A washing machine intended for cleaning, rinsing and air drying metal components placed on a pallet.
The unit consists of an insulated cabinet with a lifting door, fixed spraying system and a rotating fixture for the pallets. The unit is automatically loaded by the robot.

- Maximum part size
  500 x 500 x 500 mm (19.7 x 19.7 x 19.7 in)
  including pallet, chuck and workpiece

- Maximum weight
  200 kg (440 lbs) including pallet, chuck and workpiece
GF Machining Solutions

**Milling**

*High-Speed and High-Performance Milling Centers.* In terms of cutting speed, HSM centers are 10 times faster than conventional milling machines. Greater accuracy and a better surface finish are also achieved. This means that even tempered materials can be machined to a condition where they are largely ready to use. One essential advantage of HSM is that with systematic integration, the process chain can be significantly shortened. HSM has developed alongside EDM into one of the key technologies in mold and tool making.

**EDM**

*Electric Discharge Machines.* EDM can be used to machine conductive materials of any hardness (for example steel or titanium) to an accuracy of up to one-thousandth of a millimeter with no mechanical action. By virtue of these properties, EDM is one of the key technologies in mold and tool making. There are two distinct processes — wire-cutting EDM and die-sinking EDM.

**Laser**

*Laser texturing.* Laser texturing supplements and extends the technologies offered by GF Machining Solutions. With our laser technology we enable you to produce texturizing, engraving, microstructuring, marking and labeling of 2D geometries right through to complex 3D geometries. Laser texturing, compared to conventional surface treatment using manual etching processes, offers economic, ecological and design advantages.

**Automation**

*Tooling, Automation, Software.* Tooling for fixing workpieces and tools; automation systems and system software for configuring machine tools and recording and exchanging data with the various system components and design advantages.

**Customer Services**

*Operations, Machine and Business Support.* Customer Services provides with three levels of support all kind of services for GF Machining Solutions machines. Operations Support offers the complete range of original wear parts and certified consumables including wires, filters, electrodes, resin and many other materials. Machine Support contains all services connected with spare parts, technical support and preventive services. Business Support offers business solutions tailored to the customer’s specific needs.
At a glance

We enable our customers to run their businesses efficiently and effectively by offering innovative Milling, EDM, Laser and Automation solutions. A comprehensive package of Customer Services completes our proposition.
