EDM - Wire
Basic training

article n°200010361 (at GF site)
article n°200010362 (at customer site)

Duration	Number of participants	Experience level	Requirements	Machines
3 days	4	Beginner	Basic techanical skills	AC Progress, CUT E, CUT P, CUT P Pro, CUT X 000

What are the course contents?

+ Understanding the EDM process

+ Mastering the HMI:

+ Navigating through the different screens

+ Machine language: Command (CMD), ISO

+ Write a machine tooling program using the Expert tool

+ Machine settings:

+ Preparing the machine and its environment

+ Wire tension and stability

+ Position and alignment of guides

+ Threading positions

+ Verification of control points

+ References and position of workpieces

+ Learning and using machining parameters

+ Machine maintenance

What is the course objective?

+ In this course, participants learn how to make their first workpieces on a wire EDM machine and work unassisted.

What are the course benefits?

+ Learn the key functions of the EDM machine.
